

Breathe Into Your Massage

Mindful Breathing Enhances Bodywork Benefits

Cathy Ulrich

During her massage, Elaine was having trouble relaxing, continually talking about all of the stressors in her life. I took a deep breath and asked her to do the same. Suddenly, her body relaxed and I finally felt her respond to the work I was doing. So, what shifted with that simple suggestion?

In The Moment

Elaine was thinking about the stresses in her life instead of where she was at the moment. She was in a safe space, receiving gentle, supportive bodywork. And yet she couldn't relax. By simply asking her to be mindful of her breath, she immediately felt her body and became present with me in that space.

control labor pain. By consciously breathing during contractions, they learn to shift the feeling of pain to just sensation.

Elaine came to see me because she had chronic pain in her foot, knee, and hip. Often chronic pain sets up as a vicious cycle of muscle tightness, impaired blood flow, and more pain, even in areas distant from the original problem. When I asked Elaine to send her breath to the foot, she changed her feeling of pain to simply sensation and this opened a door that allowed me to change the holding pattern in her tissue.

Of course she couldn't physically breathe into her foot, but the imagery of

**Breathe Into Your Massage
The Health Benefits of Ginger
Easing Holiday Angst**

Mindful breathing brings an individual back into their body, facilitating presence and relaxation.

Many meditation traditions use the breath to quiet the mind. With mindful breathing, we're suddenly thrust into an awareness of our inner spaces and a feeling that we actually do live in a body.

Reduce Pain

One of the first things expectant mothers learn in natural childbirth classes is breathing techniques to help

sending warm, healing breath into her foot from the inside while I worked on it from the outside changed her relationship to the pain.

Try this simple technique yourself. As you tune into your breath, notice your body. Is there discomfort or pain?

Continued on page 2

Continued from page 1

Breathe in, and think of filling your lungs with healing oxygen. Now breathe out, and imagine sending this warm, healing oxygen directly to the place that hurts. Continue gently breathing into the area for a few minutes. What does it feel like now?

Relieve Stress

When I worked with Elaine, I noticed that the more she talked about her stressful life, the shallower her breath became. She was breathing high in her chest in short, rapid breaths. Her mind had transported her back to her stressful life, even though she was in a place where she was supported and encouraged to take a break from that stress, putting her body into a fight-or-flight response.

One clear manifestation of this is rapid, shallow breathing. While stress can produce this breathing pattern, the good news is that we can consciously change the breathing pattern and reduce the stress. It works both ways.

As I asked Elaine to slow her breathing and take deeper breaths, the tension in her face softened. Her body relaxed on the table as if she were sinking into the padding. Her feet became warmer, a sure sign that her circulation had changed and that her nervous system had switched from fight or flight to the calming mode of rest and digest.

Try this for yourself. The next time you're feeling stressed, stop for a moment and notice how you're breathing. Is your breath high in your chest? Is it fast and shallow? Now, gently invite your breath to slow down. Start to pull breath into your lungs by letting your belly relax and expand as you inhale. Spend a few moments with yourself and your breath and look at the stressful situation again. Does it seem so bad now?

Your Massage

Receiving a massage does involve participation on the client's part. While the practitioner is the expert on the bodywork, the clients are the experts on their bodies. In our culture, the client/therapist relationship is often a check-your-body-at-the-door affair. But so much more can happen when the client works with the therapist.

The next time you go for a massage, try these suggestions to achieve mindful breathing and enhance the benefits of your session:

- As you settle onto the table, feel the weight of your body on the table and begin to notice your breath.
- Feel your breath moving of its own accord. Where is it most noticeable? Bring into the spaces that feel less full (without effort--just invite).
- When your therapist starts working, notice the pressure and rhythm. When your practitioner lets up on the pressure, breathe in. When she/he applies pressure, breathe out.
- If your practitioner comes to a tender area, pay special attention to your breath. Work with the tenderness on the exhale, imagining that you're

breathing out the pain.

- As your therapist works on different areas, imagine your breath moving there to meet her. Send your breath wherever she is working. Let her work on the outside, you work on the inside.
- Notice the changes as the massage progresses. Notice your thought patterns. Notice your comfort level. Notice your stress (and how it melts) as you send breath to the various areas of your body.
- When your session is complete and you sit up, notice how your breath feels. What do you notice about your body, the room, the light?

Why not use the lifegiving force of breath to make your next massage an even more beneficial experience. Just breathe.

Being actively aware of your breath during a massage enhances the benefits of your session.

The Health Benefits of Ginger

Easing Nausea, Joint Pain, and Allergies

This pungent spice is found in cuisine around the globe, but ginger has also been used for more than 2,500 years for its medicinal properties. The ancient Chinese knew that it aided in the absorption of many herbal preparations and they prescribed it extensively as a digestive tonic.

A native root of southeast Asia, ginger is a potent ally in the treatment of nausea, motion sickness, and joint pain. Current research confirms ginger's efficacy as an anti-inflammatory, GI calmativ, and antihistamine. The active ingredients found in ginger -- gingerols and shagoals -- lower levels of prostaglandins, the chemicals responsible for pain and inflammation in joints and muscles. By reducing prostaglandins, ginger can even have a positive effect on heart health and circulation because chronic, systemic inflammation increases the risk of heart attack and blood vessel compromise.

Ginger comes in several forms. Fresh and dried ginger is available in

supermarkets for use in cooking. It's also available in capsules, an extract pill form, prepackaged tea bags, crystallized, and as a topical oil.

Recommended Uses

MOTION SICKNESS AND NAUSEA

Most medications for nausea and motion sickness work to calm the nervous system and can cause drowsiness and dry mouth. On the other hand, ginger calms the digestive tract directly and has been shown to reduce nausea after surgery and chemotherapy. For motion sickness, take 100 mg two hours before departure and every four hours afterwards or as needed.

ARTHRITIS AND MUSCLE ACHES

Massage ginger oil into affected areas and/or take up to 1 g of powdered ginger daily to reduce inflammation.

COLDS AND ALLERGIES

Drink up to 4 cups of ginger tea daily or enjoy authentic ginger ale (made from real ginger).

The ginger plant has many medicinal uses.

Easing Holiday Angst

Five Stress Busters for a Joyous Season

You enter the holiday season with the best of intentions -- looking forward to time spent with family and friends, decorating, shopping, baking. But as soon as you pile holiday activities on top of an already busy life, you're likely to find yourself relating more to Ebenezer Scrooge than Martha Stewart.

Consider these five suggestions to keep holiday stress at bay:

1. DETERMINE A SHOPPING BUDGET

For many, gift giving is an important part of the holidays, serving as a way to express love and appreciation for friends and family. But when the credit card bills arrive in January, you may discover you've extended your holiday stress well into the New Year. Plan your budget in

advance, determine what you can spend, and stick to the plan.

2. CREATE A TIME BUDGET

Many will make a shopping budget, but what about making a time budget? Before accepting every invitation this year, decide ahead how many parties you can and want to attend while maintaining your sanity. Make choices about your time commitments based on what you'd really like to do this year, rather than what you think you should do or what you've always done. Don't forget to leave time for yourself.

3. SET FOOD-INTAKE BOUNDARIES

You'll likely be tempted to eat in excess, and don't be too hard on yourself if you don't stick to your pre-holiday eating

standards. But do decide ahead of time just how much you'll deviate from your eating routine.

4. STICK TO YOUR EXERCISE REGIMEN

Regular exercise is a powerful stress buster. You'll feel better, sleep better, avoid weight gain, boost your immune system, and maintain a positive outlook about yourself. While it may seem like an easy time concession to make, don't give in to the idea. Stick to exercise, and you'll thank yourself for it.

5. TAKE TIME TO REST

Take time from your schedule to honor the cycles of the season. The holidays fall during winter solstice -- the shortest day of the year. Learn from nature, and get plenty of rest.

*Whatever words
we utter should
be chosen with
care, for people
will hear them
and be
influenced by
them, for good
or ill.*
